TEAM LEADER
&
SOFTWARE ENGINEER

ESSENCE

- Open to challenging freelance assignments related to any of my specialities. Should I accept a permanent position it would be the dream place. A place which allows further exploration of my strong ambitions in AI and machine learning. Technologies when applied to bioinformatics, robotics, game development and related domains truly shine the brightest and lead to extraordinary possibilities.
- With experience as a team leader, product manager, system architect and developer, I've had the privilege to work with some amazing people in the areas of bioinformatics, medicine, mobile technology, e-commerce, and avionics.
- In essence my passion is to use science and technology in order to help enrich and improve people's lives. When you realize that human creativity and collaboration is more important than the technology which augments it, amazing things happen.

EXPERIENCE

2009 – now Salem Creative Stockholm
Founder

Technical consultant and product developer

2012 Truecaller
Stockholm

Android developer and team leader

At Truecaller I was the Android team leader with responsibility for team members, product design, system architecture and development.

Truecaller is a global name and number search service for smartphones, with features such as social network connections, call filter and dynamic number lookup during calls. With Truecaller you have access to a global phonebook in your hand, finding the information relevant to you.

2006 – 2008 Saab Avionics Järfälla
Senior system developer

For this consulting assignment I was engaged as a Java Enterprise resource in a project for developing a support system for a radar warning

system and related modules which analyse flight data, detect threats and activate different forms of counter measures. The project methodology was agile implemented XP and Test Driven Development.

2005 – 2006 mBlox Northern Europe Stockholm
Senior system developer and product manager

My work at mBlox included all aspects of the system development cycle – analysis, architectural design, implementation, testing and deployment. This has been applied to business critical systems for billing, customer management, telecommunications traffic statistics and similar solutions which support the mobile platform of mBlox for SMS, MMS and related applications.

2003 – 2004 Bioseeker Stockholm
Technical director

System developer and project leader with overall technical responsibility. Focus on Java Enterprise, the MVC framework Struts and Oracle databases. During this position I have improved and developed Bioseeker's system where they present their strategy for business intelligence and market and sell their analytical reports in the biotechnology domain. Furthermore I developed their e-business platform Biomarket Group which works as a marketplace for both Bioseeker and their partners worldwide.

1999 – 2003 SysTeam Infogator Stockholm
Senior system developer

I have here participated in a number of projects where I had the role as both system developer and project leader with frequent customer contact. The work have consisted of the complete process from conceptual modelling, database modelling, to implementation, tuning and support. The biggest project (roughly two years) was for the client Lessmore where we both adapted the product Dynamic Trade for dynamic markets and also built a tailor-made frontoffice and backoffice system according to their specific requirements.

EDUCATION

2013	Stanford University
<i>Machine Learning</i>	
Independent course	
2009 – 2011	Steneby – School of Art and Design
<i>Art and Design Exam</i>	
Artistic education with major in metal craft and design	
1995 – 2000	Stockholm University and KTH
<i>Master of Science</i>	
Master's degree in computer science with major in adaptive systems, artificial intelligence and machine learning. The master's work was performed at the Swedish Institute of Computer Science (SICS).	
1995	Stockholm University
<i>Independent course</i>	
Mathematical Analysis, Linear Algebra and Combinatorics	

SKILLS

Agile project management	Advanced
Android	Advanced
Java Enterprise	Advanced
Java Standard	Advanced
Spring Framework	Advanced
Database design and development	Advanced
Web Services, REST, JSON	Advanced
Web development, HTML5, CSS3	Advanced
Ajax, Javascript, jQuery	Advanced
XML, XSL, XSLT	Advanced
C / C++	Advanced
AI / machine learning	Advanced
Octave / Matlab	Average
Prolog, Scheme, Lisp	Average
Graphical design and user experience	Average
Quality assurance and test processes	Average
Visual Studio .Net / C#	Average
Linux, Unix, Bash	Average
PHP, CGI	Basic

MERITS

- Certified Scrum Master
- Certified Java Developer
- Certified IBM Rational Application Developer
- Member of the Business section at Stockholm University / KTH
- Member of the Cultural section at Stockholm University / KTH
- Driving license

PERSONALITY

Apart from science and technology in general, and biotechnology, machine learning and mobile technology in particular, I find balance in martial arts, music, metal craft and design. I've been told that I am a quick learner, good tutor, and with an ability to bring out the best in others. I truly enjoy working with motivated ambitious people, solving difficult problems leading to great opportunities.
